F, IG, IN: @dr.nadiaboutaoui

Dr. Nadia Boutaoui is an accomplished entrepreneur and researcher in respiratory diseases (34 peer-reviewed research papers). She obtained her Engineering degree from INA, Algiers, a Ph.D. in Genetics from the University of Reading and over 15 years of research experience, she has worked with prestigious institutions like Harvard Medical School and the University of Pittsburgh. Dr. Boutaoui is the founder of NanoNares, a startup focused on preclinical tools for respiratory drug development.

As a senior innovation and growth advisor to iDoc and Provenmed, Dr. Boutaoui plays a pivotal role in guiding the growth of cutting-edge healthcare solutions. She also leads entrepreneurs in healthcare, wellness, and tech, fostering innovation and supporting impactful businesses. Dr. Boutaoui trains business leaders on leveraging AI for growth, helping them leverage AI to accelerate their success.

Her leadership earned her recognition as one of LinkedIn's Top 40 Global Thought Leaders in 2022, top voice in startups and AI and as Woman of the Year 2023 by the Society of Foreign Consuls in NYC, representing Algeria.

Dr. Boutaoui's community-building efforts include leading the organization of the "Day of knowledge" along other prominent Algerian scientists for three years and training and mentoring Agritech startups in Algeria. With a dedicated following of over 46,000 on social media, and >10,000 newsletter subscribers, she inspires others through impactful content on business, innovation, and leadership.
